

my name and surname is Yasin Nikkhah Khajah Ataei, among my friends they also call me khayou, which means brother, in the occult and shamanic communities they also call me habibi, which means dear and beloved of the unseen, they also call me Stefan and they also call me Hormuz and other names

I am a shaman and a pagan, and I personally agree with many of the teachings of Islam, Christianity, and Judaism, and I feel close to them, and I also disagree with many of their teachings. I am a completely pagan shaman-witch, which I have felt since childhood, and I highly believe that I have played this role several times in many of my reincarnations, thousands or millions of years ago, because at my age I had a strange mastery over these sciences, even more than teachers who had years of experience. I remember that I did not learn during my training, but I always remembered and even understood many things earlier. I say thousands or millions of years of reincarnation because the corneas of my eyes are so black that anyone who looks into their depths feels like they are sinking into a deep black hole, or when they stare at it, they always say that it looks either like a black hole or like a portal that is constantly open and connected to another world, and several people have seen another world in it and describe it as a hole that It has opened from another world, and I have heard from someone before that dark eyes indicate an old soul and bright eyes are younger souls. And some people, if they stare at my eyes, suddenly see a veil or fog or cloud in front of my face that prevents them from seeing my face. Several people have experienced this, or they have seen beings deep in my eyes. Since childhood, I have seen gods in full detail many times, which I now understand when I read about them, or demons, or even images of the future and other worlds, or people made of bluish-white light. As I said before, I have had many sudden revelations like revelations, or I have been able to hypnotize my eyes without practice, or several times people have said that they have seen beings or guardians or angels or people holding flags with me for a moment, and that whenever a demon attacks me in a dream, I have killed it and cut off its head, or defeated it in some way, or many times in The awakening of the evil people who attacked me. God, with His infinite power and infinite grace, has miraculously saved me. Of course, geographically, I was born and live in an area that is the meeting point of several nations: the meeting point of the Persians, Hindus, Africans, and Arabs, which is known as the 4 paths of civilizations. Its name in ancient Persian means the place of the God of Gods. Its culture is very rich, ancient, and strange because it is

precisely a fusion of the cultures of the Hindus, Arabs, and Africans, which is based on the culture of the Persian nation. All of these peoples are present in the ancestors of all the inhabitants. Of course, the English and Portuguese have lived here for many years and then left. Its soil is rich in large amounts of uranium and other elements. Many of its areas have soil that is bloody, oil blue, or crimson, and it shines. There is an island a few kilometers away, each part of

which is one color, with a total of more than 70 colors identified. Many say that this The elements have caused supernatural genetic mutations in the people here, and hundreds of examples of different supernatural beings have been observed here, whereas in other regions of the world, perhaps a maximum of 10 supernatural and occult beings have been found in their culture, but we have hundreds, perhaps more than a thousand supernatural and mythical beings in our culture, in a region that is not very large and has a total population of 700,000 people. People here have always lived with these beings, and their beliefs are based on such issues, and they are used to always making sacrifices to these beings or gods or to nature such as the sea, mountains, and desert. Almost at the moment, it can be said that I am the strangest person present in this region in everyone's opinion. Many people have told me that you are either a savior or that you have come to unite all nations and cultures, or they say that we have met you .before in dreams or in other lives or in other dimensions In every tradition that I entered and worked in, after a while, they all respected and honored me as much as their leader, and they all said that you are the carrier of the spirit of the God of our gods. You are or you are the next one who is going to lead us, .even if they had different gods or different traditions
